SOURCE

25X1A 1. construction work on underground installations for the Caracal (XB 31) airfield was in progress near the Devesclu railroad station. * Sheet-metal plates and wrought iron were supplied by the Resita Plant.

25X1A Comment. This is the first report of underground installations for an airfield in Rumania. The great distance of the site from the field makes it possible that an underground fuel dump for the field is being constructed.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 13 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
